

Magento 2 Recent Order

Add Recent Order in Magento 2x Store

Introduction

Acx RecentOrder is a Magento 2 extension, which creates an atmosphere of customer trust and increases your online sales conversion via social proof which ups your company's reputation. The extension gives visitors last ordered products displayed pop-up box on the lower left-hand side of the screen. The display includes the customer's location and product purchased.

Installation

Never do anything directly on a live store. First setup and test on a development domain (i.e. "dev.url.com").

Make sure that you [set](#) your Magento application to the developer [mode](#). Run the command on Magento2 root directory -**"magento deploy:mode:set developer"**

Temporarily disable Magento cache

To avoid any possible issues with the installation we recommend disabling Magento cache before proceeding with the installation and re-enabling it once the install is complete.

1. Log in to your Magento admin
2. Go to System > Cache Management
3. Select "Select All" in the "Mass Actions" drop down
4. Select "Disable" in the "Actions" drop down and Click Submit
5. Once the page reloads **log out of the admin**

Agilecodex Admin Panel - Cache Storage Management

Buttons: **Flush Cache Storage** | **Flush Magento Cache**

Actions: **Disable** | **Submit** | 13 records found (13 selected)

Cache Type	Description	Tags	Status

Upload Acx_Backend and Acx_RecentOrder module.

We will provide a zip folder and you have to extract the contents of this zip folder on your system. On this content you will find Acx folder. You have to put this folder in **App>code** folder in Magento 2 project.

Install Extension

1. Enable **Acx_Backend** and **Acx_RecentOrder** module .

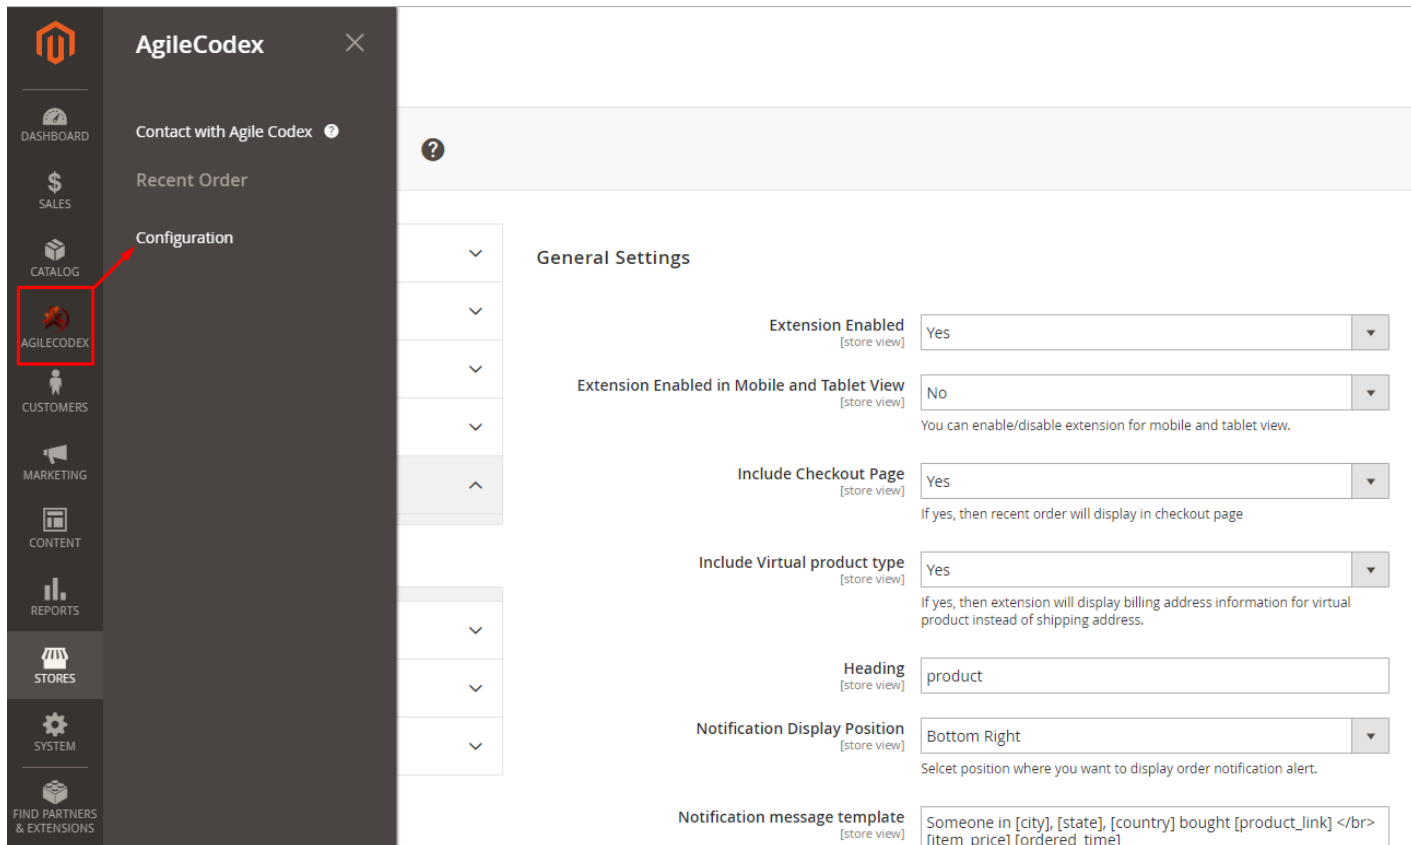

For how to enable magento 2 module follow this

<http://devdocs.magento.com/guides/v2.1/install-gde/install/cli/install-cli-subcommandsenable.html>.

2. After the successful installation, you have to run the command on Magento2 root directory-
“**php bin/magento setup:upgrade**”
3. Also, run this command into the Magento2 Root- “**php bin/magento setup:static-content:deploy**”

Admin Configuration – Magento 2 Recent Order

1. For configuring the extension, login to Magento 2 Admin panel, go to **AGILE CODEX > Recent Order** where you can find various settings to manage the extension.

The screenshot shows the AgileCodex extension configuration interface. The left sidebar contains the following menu items: DASHBOARD, SALES, CATALOG, AGILECODEX (highlighted with a red box), CUSTOMERS, MARKETING, CONTENT, REPORTS, STORES, SYSTEM, and FIND PARTNERS & EXTENSIONS. The main content area is titled 'AgileCodex' and shows the 'Recent Order' configuration page. The 'General Settings' section includes the following options:

- Extension Enabled** (store view): Yes
- Extension Enabled in Mobile and Tablet View** (store view): No
You can enable/disable extension for mobile and tablet view.
- Include Checkout Page** (store view): Yes
If yes, then recent order will display in checkout page
- Include Virtual product type** (store view): Yes
If yes, then extension will display billing address information for virtual product instead of shipping address.
- Heading** (store view): product
- Notification Display Position** (store view): Bottom Right
Select position where you want to display order notification alert.
- Notification message template** (store view): Someone in [city], [state], [country] bought [product_link] </br> [item_price] [ordered_time]

Design Settings

- Go > AGILE CODEX >Recent Order> Design Settings

The screenshot displays the 'Configuration' page in the Agile Codex system. On the left is a vertical sidebar with icons for Dashboard, Sales, Catalog, Customers, Marketing, Content, Reports, Stores, and System. The main area is titled 'Configuration' and includes a 'Store View' dropdown set to 'Default Config'. A red box highlights the 'Save Config' button in the top right corner. Below the 'Store View' dropdown, there are two sections: 'General Settings' and 'Design Settings'. The 'Design Settings' section is expanded, showing color pickers for Background Colour (#0A0909), Border Colour (#FF0000), Text Colour (#0000FF), Link Colour (#00FF00), and Link Hover Colour (#C77314). Each color input has a corresponding color swatch and a '[store view]' label.

- **Background Colour:** Pick a colour from the colour picker or set hex colour code for popup area background.
 - **Border Colour:** Pick a colour from the colour picker or set hex colour code for Border Colour.
 - **Text Colour:** Pick a colour from the colour picker or set hex colour code for Text Colour.
 - **Link Colour:** Pick a colour from the colour picker or set hex colour code for Link Colour.
 - **Link Hover Colour:** Pick a colour from the colour picker or set hex colour code for Link Hover Colour.
-
- **Go > Save Config**

Thank You

Once again, thank you so much for purchasing this extension, I'd be glad to help you if you have any questions relating to this extension.
