Installation

Never do anything directly on a live store. First setup and test on a development domain (i.e. "dev.url.com").

Make sure that you set your Magento application to the developer mode.

Temporarily disable Magento cache

To avoid any possible issues with the installation we recommend disabling Magento cache before proceeding with the installation and re-enabling it once the install is complete.

1. Log in to your Magento admin
2. Go to System > Cache Management
3. Select "Select All" in the "Mass Actions" drop down
4. Select "Disable" in the "Actions" drop down and Click Submit
5. Once the page reloads **log out of the admin**

Upload Extension

Unzip the extension zip file and upload all files and folders of Backend, Base and AdvancedDashboard extension to the root folder of your Magento installation.
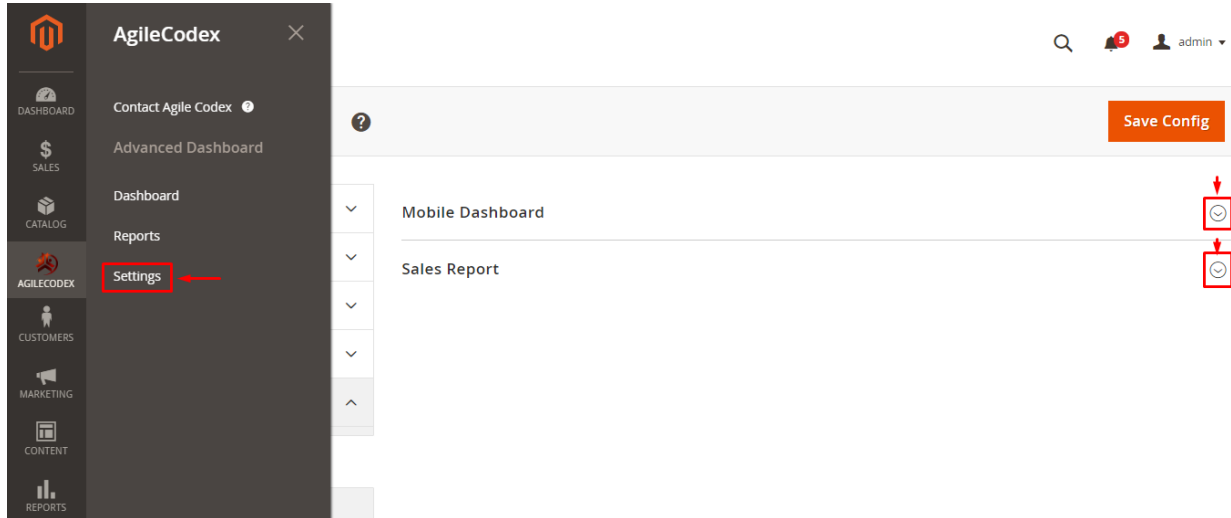

Install Extension

1. Enable Acx_Backend, Acx_Base and Acx_AdvancedDashboard module.
2. Upgrade and deploy.

For how to enable magento 2 module follow this link.
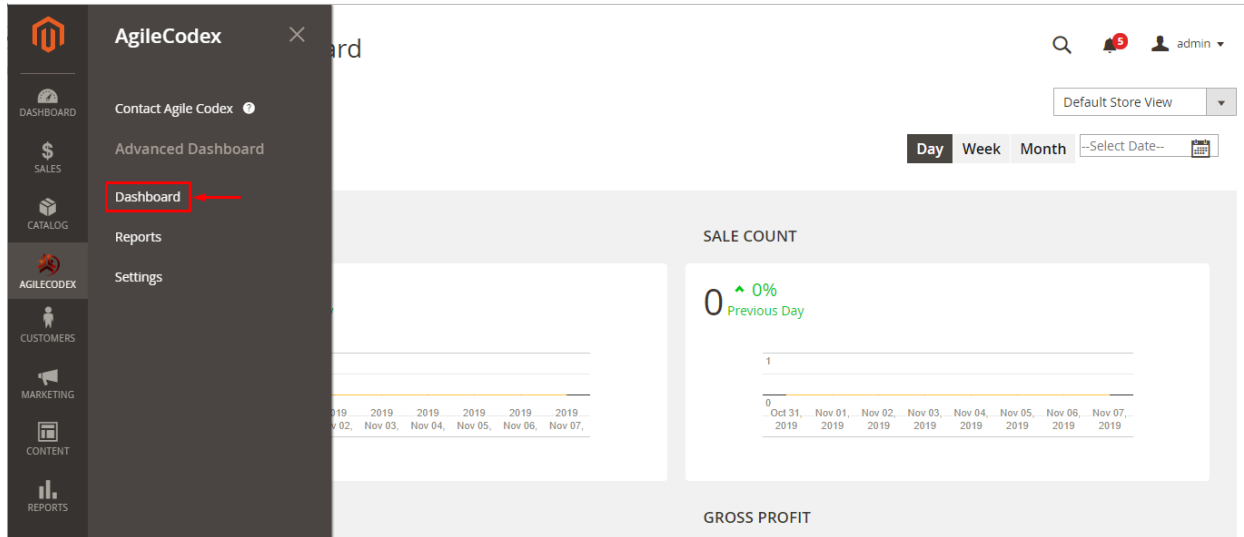

Advanced Dashboard Configuration

1. **Go to AGILECODEX -> Advanced Dashboard -> Settings**

2. **Mobile Dashboard:** You can get mobile dashboard access.
3. **Sales Report:** This is the allowed option of either pricelist is imported from supplier or not.
**About Advanced Dashboard**

Filtering Options of Advance Dashboard

Go to **"AGILECODEX -> Advanced Dashboard -> Dashboard"** from admin panel.

- There are 3 buttons "Day", "Week" and "Month". The "Day" button show these reports (revenue, sales count, customer count, gross profit etc.) as daily of your company. The "Week" button show these reports as weekly and the "Month" button show these reports as monthly.
- There is another filtering option data. Here you can select any recent date that the selected date apply to the report as a current date.
